PROFESSIONAL SUMMARY

Bilingual software developer focused on Java 21, Spring Boot, REST APIs, and backend security. Built independent banking, customer loyalty, and e-commerce API projects using relational and NoSQL databases, automated tests, and CI workflows. Seeking a backend or full-stack software development role.

TECHNICAL SKILLS

Backend: Java 21, Spring Boot, Spring Security, Spring Data JPA, Hibernate, Node.js, Express.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, SQL, Mongoose

Security: JWT, Role-Based Access Control, Passport.js, Google OAuth

Testing & DevOps: JUnit 5, Mockito, MockMvc, Mocha, Chai, Supertest, Docker, GitHub Actions, Git, Maven, Swagger/OpenAPI

Frontend: Next.js, React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

TECHNICAL PROJECTS

SecureBankCore | Banking REST API - GitHub

Java 21, Spring Boot, Spring Security, PostgreSQL, Flyway, JPA, JUnit, Mockito, Docker

- Built banking backend workflows for account management and money transfers using layered controllers, services, and repositories to organize transaction logic.
- Implemented JWT-based security, business-rule validation, and exception handling to protect endpoints and reject invalid operations.
- Validated backend behavior with an automated test suite of 80 passing tests, supporting reliable changes and regression checks.

LoyaltyOS | Restaurant Loyalty Management Platform (In Progress) - GitHub

Java 21, Spring Boot, Spring Security, MySQL, JWT, Next.js, TypeScript, JUnit, Mockito

- Designed a full-stack platform in response to a restaurant need for centralized customer loyalty points, rewards, and redemption workflows.
- Developed Spring Boot REST APIs and relational models for customer and reward operations, using JWT authentication to secure access.
- Built a Next.js dashboard for customer lookup and loyalty actions, integrating frontend interactions with backend services.

NodeCommerceAPI | E-Commerce Backend API - GitHub

Node.js, Express.js, MongoDB, Mongoose, Passport.js, Docker, GitHub Actions

- Developed a modular REST API with routes, controllers, services, and data models to separate business logic and persistence concerns.
- Implemented authentication with Passport strategies and JWT, and documented API endpoints with Swagger/OpenAPI.
- Configured automated API testing and GitHub Actions workflows to support repeatable code validation.

EDUCATION

Johnston Community College | Smithfield, NC
Computer Science Coursework (Degree Not Completed)

LANGUAGES

Spanish (Native) | English (Fluent)
